

# CSA1503-CLOUD COMPUTING AND BIG DATA ANALYTICS

## STUDENT COUNSELLING SYSTEM

### INPUT:

A Student Counselling System is a cloud-based application that helps students connect with counsellors for academic, career, and personal guidance. The system allows students to register, book counselling appointments, submit their concerns, and view counselling schedules. Counsellors can manage appointments, maintain student records, provide guidance, and update counselling reports.

The screenshot displays a web-based form for a 'std counselling' system. The interface is divided into three main sections: a 'Basic Fields' sidebar, a central form area, and a 'Field Properties' sidebar on the right.

**Basic Fields:** This sidebar contains a grid of field types for selection, including Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down.

**Central Form Area:** This section contains a list of fields for data entry. The first field, 'Name', is highlighted with a blue border and a trash icon. Other fields include 'student Id', 'Age', 'Address', 'Course', 'Year of passing', 'Percentage of marks', 'Domain Interest', 'Counsellor Name', and 'Counselling Date'.

**Field Properties:** This sidebar allows for configuration of the selected 'Name' field. It includes options for 'Field name' (set to 'Name'), 'Field link name' (set to 'Name'), and 'Validation' (with a 'Mandatory' checkbox). Under 'Display Fields', checkboxes for 'Prefix', 'First Name', 'Last Name' (which is checked), and 'Suffix' are visible. A 'Data Privacy' section is also present at the bottom.
