Design and Development of an Intelligent Decision Support System for First-Time International Travel Readiness

Presented by : RASHMI NAURENE (192521357)

: PRETHIVIKA G(192521085)

: CHEREDDY HARITHA(192425280)

Subject code: CSA0927

Subject Name: JAVA PROGRAMMING

Guide name(s): Dr. L.PUSHPALATHA

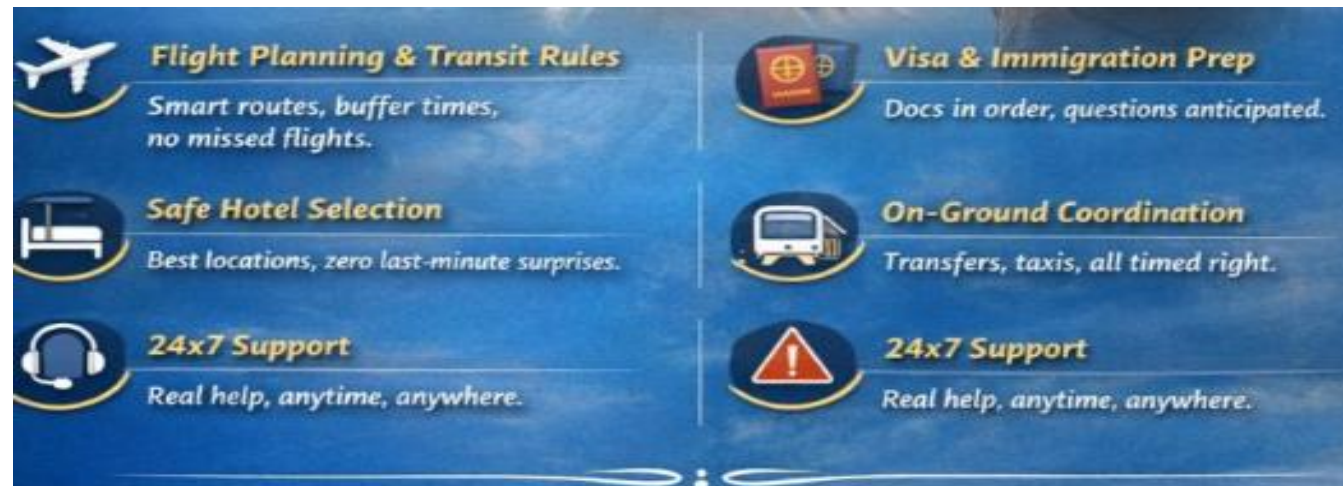

INTRODUCTION

- International travel can be exciting but also challenging, especially for first-time travellers.
- They often face difficulties such as understanding visa requirements, estimating travel expenses, booking accommodations, and adapting to new cultures.
- Lack of proper planning may lead to financial stress, safety issues, and communication barriers.
- An Intelligent Decision Support System (IDSS) helps travellers make informed decisions by providing personalized recommendations based on destination, budget, travel duration, and personal preferences.

PROBLEM STATEMENT

- First-time international travellers often struggle to understand the complete travel process due to fragmented information, varying country-specific regulations, financial uncertainties, and language barriers.
- Existing solutions provide isolated services such as flight booking or visa information but do not offer an integrated platform that guides users through every stage of their international journey.

OBJECTIVE

- **To assist first-time travellers in preparing for international travel** by providing personalized guidance on visa requirements, documentation, accommodation, transportation, and travel planning.
- **To evaluate financial readiness and manage travel expenses** by estimating trip costs, analyzing budgets, providing currency information, and recommending cost-effective travel options.
- **To support cross-cultural adaptation and informed decision-making** by providing cultural etiquette, local customs, language tips, safety information, and personalized recommendations.

EXISTING VS PROPOSED SYSTEM

Existing Approach	Proposed IDSS
Information scattered across websites	Information integrated in one system
Manual budget calculation	Automated budget estimation
Generic travel advice	Personalized recommendations
Limited cultural guidance	Destination-specific cultural guidance
Traveller makes decisions manually	AI-assisted decision support

Key Features

1. Travel Preparation

- Personalized Travel Preparation Roadmap
- Country-Specific Documentation Checklist

2. Financial Readiness

- Living Expense Calculator & Budget Planner
- Minimum Fund Requirement Estimation

3. Cross-Cultural Adaptation

- Real-Time Travel Phrase Translation
- Cultural Etiquette & Adaptation Guide

4. Smart Travel Assistance

- Personalized Travel Recommendations
- Emergency Contacts & Important Travel Information

Working Process

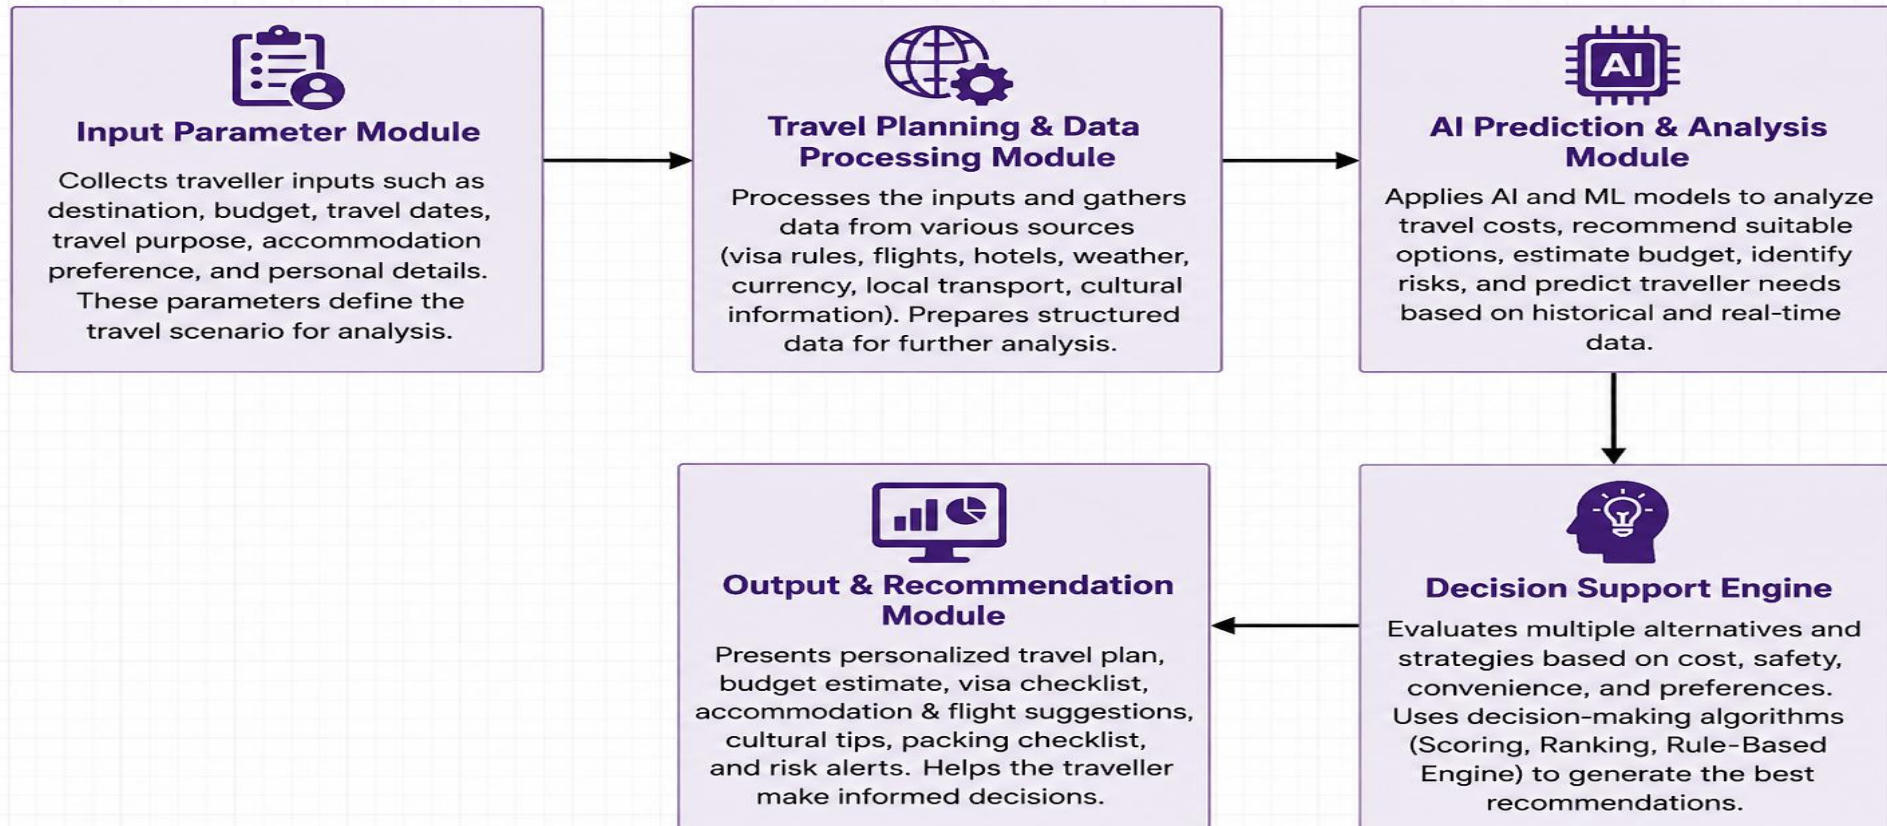

1. User enters travel details.
2. System validates user information.
3. Budget and financial readiness are calculated.
4. Visa requirements are checked.
5. AI recommends travel plans.
6. Cultural information is displayed.
7. Final travel checklist is generated.

ARCHITECTURE DIAGRAM

Module 1 – Intelligent Travel Readiness & Documentation Planner

- This module creates a personalised travel preparation roadmap based on the user's destination country and travel purpose.
- It provides a step-by-step timeline covering passport, visa, insurance, accommodation, required documents, airport procedures, immigration requirements, and post-arrival formalities.
- The system also evaluates the user's travel readiness through a progress score and highlights missing requirements before departure.

Module 1 – Implementation

Module 2 – Financial Readiness & Expense Planning System

- This module helps users understand the financial requirements of travelling abroad.
- It calculates visa fees, minimum financial proof required by different countries, estimated relocation expenses, and expected monthly living costs.
- Users can compare their available savings against expected expenses, estimate their financial preparedness, and receive intelligent suggestions for budgeting and expenditure planning.

Module 2 – Implementation

Personal Expense & Readiness Intelligence

Manage and log expenses, planned monthly budgets, and analyze spending runways.

Financial Estimates & Runways

Your savings cover initial setup, but leave you below the recommended relocation reserve buffer. Estimated setup costs: ??? 18,500.07.

Module 3 – Multilingual Communication & Cultural Adaptation Assistant

- This module assists travellers in overcoming language and cultural barriers.
- The application supports multiple Indian regional languages, allowing users to interact with the system in their preferred language.
- It also provides real-time translation of common travel conversations, practical cultural etiquette, local customs, emergency phrases, and everyday communication guidance to help users adapt confidently to their destination country.

Lost Passport Action Protocol

Step-by-step resolution process.

1. File a report immediately at the nearest police station and get an official copy (Loss Report).
2. Contact your home country's embassy or consulate in United Arab Emirates to apply for an Emergency Certificate (EC) or replacement passport.
3. Bring proof of identity, travel itinerary, photos, and police report copy to the embassy.
4. Apply for a replacement exit visa if required by the host country.

FUTURE SCOPE

- AI Chatbot & Voice Guidance for personalized, real-time travel assistance.
- Real-Time Flight & Safety Alerts for delays, fraud, scams, and travel risks.
- Offline Travel Guide with essential destination information available without internet.
- Digital Payment Integration for convenient and secure travel transactions.
- Multilingual Support to improve communication across different countries and cultures.

CONCLUSION

- ❖ Provides a unified platform for first-time travellers to plan and prepare for international travel.
- ❖ Supports financial readiness through budget planning, expense estimation, and fund analysis.
- ❖ Improves travel readiness and cultural awareness through documentation, language, and cultural guidance.
- ❖ Enables safer and smarter travel through personalized recommendations, helping users travel with greater confidence.

THANK YOU
